次の英文を読んで、あとの問いに答えなさい。

Jim is my friend who lives in Canada. When he visited me last summer, he said to me, "It is very hot. Do you have hot summer days like today this year, Satoshi?" I answered, "Yes. I think this year is hotter than last year." Then Jim asked me, "Do you know the word 'global warming'?"

Jim and I began to talk about global warming while we tried to get information from the Internet. Why do we have global warming? ① The sun (leaves / but / warm / makes / the heat / the Earth)

Temperature differences from 1900

Year	1900	1920	1940	1960	1980	2000
Difference(°C)	0	-0.1	+0.3	+0.2	+0.2	+0.6

the Earth soon. So the temperature has been good for every living thing on the Earth. But when we burn fossil fuels to get energy, we have much CO₂ in the air. The CO₂ absorbs the heat and the Earth gets warmer. On the Internet we found the temperature (A) up 0.6°C from 1900 to 2000.

Jim said, "If the Earth gets warmer, (②) will happen?" I thought for a minute and said, "We will have only a little ice in the Antarctic and have too much water in the sea." He said, "That's right. Then (②) will happen?" I thought for another minute and said, "The level of sea water will rise and many beaches will be under water." He said, "If the level of sea water rises, many towns and villages near beaches will also be under water in the future." ③ I was surprised to (ア) his words and said, "Global warming is a very big (イ)."

Jim also said, "In Canada we look after forests very carefully because trees absorb much CO₂ in the air. We are (B) many things in our lives to stop global warming." After we talked about global warming for some time, we began to think how to stop it. These are three ideas we found on the Internet.

- 1 If we don't watch TV for an hour in a day, we will cut 4.8kg of CO₂ in a year.
- 2 If we don't use the air conditioner for an hour in a day, we will cut 6.6kg of CO₂ in a year.
- 3 If we don't use 40°C water and use 30°C water to wash the dishes, we will cut 19.8kg of CO₂ in a year.

(注) global warming : 地球温暖化 heat : 熱 living thing : 生物 burn fossil fuel(s) : 化石燃料を燃やす energy : エネルギー
CO₂ (Carbon Dioxide) : 二酸化炭素 absorb : 吸収する difference(s) : 違い Antarctic : 南極 level : (水平面の)高さ
look after ~ : ~を保護する air conditioner : エアコン

(5) 次のア～エの中から、本文の内容と一致するものを1つ選び、記号で答えなさい。(8点)

ア The Earth gets warmer and the temperature rises every year because a lot of CO₂ is in the sea all over the world.

イ If the Earth gets warmer every year, all the towns and villages in the world will be under water in the future.

ウ A lot of people in Canada are very interested in global warming but do nothing to look after forests.

エ If we don't watch TV for an hour in a day to stop global warming, we can cut 0.4kg of CO₂ in a month.

(6) 次の文章が、本文の要約となるように、(ア), (イ)のそれぞれにあてはまる最も適切な語を、本文中から選んでそのままの形で書きなさい。(5点×2=10点)

We make a lot of CO₂ in the (ア) around the Earth when we burn fossil fuels to get energy. It absorbs heat and the Earth gets warmer. Many towns and villages near beaches would be under water in the future (イ) we didn't save energy. After talking about global warming, however, we found three things to stop it on the Internet.
